DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13, 17-33 and 37-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,502,419. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 11 of '419 comprises a sorbent, a sorbate, a pressure chamber, non-thermal reaction, a pump which includes a first chamber that is connected to the enclosure, a second chamber that is separated from the first chamber by a movable member, and valve means for controlling the flow of a fluid into and out of the second chamber in response to movement of the movable member; wherein the pressure chamber comprises the first chamber. Controller, valve, enclosure includes first and second conductors, thickness and power supply characteristics are claimed in the rest of claims of '419.

Art Unit: 3744

Allowable Subject Matter

3. Claims 14-16 and 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Januschkowetz (U.S. Patent Number 4,581,049) and Pfister et al. (U.S. Patent Number 5,855,119) are made of record as relevant prior art.
